

## New water meter installation begins

The city has partnered with VEPO Metering to replace about 15,000 residential water meters. New meters feature advanced technology that delivers more precise readings and detailed consumption data. Because older meters often report water usage inaccurately, some customers may notice a change in their water bills once the new meters are in place.

### What to Expect:

- **Advance Notice:** Residents will receive a door hanger at least 72 hours before their meter is replaced.
- **No Home Entry:** Installers will not need to enter your home at any point.
- **Temporary Disruption:** Water service will be interrupted for 30 minutes to 1 hour during installation.
- **After Installation:** Water service will resume immediately. A door hanger will be left confirming the meter replacement is complete.
- **Contractor Information:** VEPO Metering, contracted by the city, will perform the replacements. Installers will wear branded shirts, display vehicle magnets and carry identification badges. They are not authorized to enter your home.
- **Work Hours:** Monday through Friday, 8 a.m. to 5 p.m.
