

## FINAL PUBLIC NOTICE

The Federal Emergency Management Agency (FEMA) has received the subgrant application for the City of Daytona's Fire Station #1 repairs due to damages in Hurricane Irma (DR-4337-FL PW 06937). Pursuant to Executive Order 11988 and 44 CFR Part 9.12, final notice is hereby given of FEMA's intent to provide funding for this project under the Public Assistance (PA) Program.

An initial disaster-wide Public Notice was published October 6, 2017 for Hurricane Irma. Comments and other information received were fully evaluated by FEMA along with evaluation of social, economic, environmental, and safety considerations. This notice serves as a project-specific final notice for FEMA's funding action located within the floodplain.

Funding for the proposed project will be conditional upon compliance with all applicable federal, tribal, state and local laws, regulations, floodplain standards, permit requirements and conditions. This action complies with the National Flood Insurance Program (NFIP) requirements.

- Responsible Entity:** FEMA Public Assistance (PA) Program
- Applicant:** City of Daytona Beach
- Project Title(s):** PA-04-FL-4337-PW-06937; 15719 - Fire Station #1
- Location of Proposed Work:** (29.20826, -81.01698)
- Floodplain:** Project is located in the AE Zone, otherwise known as area of 100-yr flooding, per Volusia County FIRM Panel #12127C0359 J dated 09/29/2017.
- Proposed Work and Purpose:** The City of Daytona Beach repaired Fire Station #1 that was damaged as a result of Hurricane Irma. Repairs were made to the facility's electrical components, interior and exterior walls, flooring, roofing, interior and exterior utilities, contents, and to the floating dock. The City of Daytona Beach incorporated weatherproofing measures such as caulking. Fire Station #1, constructed in 1925, is listed as contributing to the South Beach Historic District, which is on the National Register of Historic Places, reference number 88001597.
- Project Alternatives:** The alternative that has been considered is the no action alternative. This alternative is not feasible as the area will remain vulnerable to risk without a functioning fire station, including hazards to human life and safety. With the no action alternative, continued negative impacts on the property, nearby residents, and the community may be experienced. Alternate locations were not considered as the damaged elements are part of a larger facility and to relocate the entire facility is not practicable. In addition, the dock used by the City is functionally dependent upon its location in the floodplain.
- Comments:** This will serve as the final public notice regarding the above-described action funded by the FEMA PA program. Interested persons may submit comments, questions, or request a map of this specific project by writing to the Federal Emergency Management Agency, Region 4, 3003 Chamblee-Tucker Road, Atlanta, Georgia 30341, or by emailing FEMA-R4EHP@fema.dhs.gov. Comments should be sent in writing with the subject line FL-4337-PW-06937, City of Daytona Beach at the above address within 15 days of the date of this notice.
